COMPLETE USELESS! Wasted my money for something like that!!! Are you just trying to take more and more money from your fans for small small things.. This is useless you wont get unlimited money and research points like you would expect, you only get \$100 000 000 and 25000 research points. I will recommend this when the money and reseach points are changed.. Its not sandbox mode if you can lose the game.. Starting money doesn't change to unlimited as you may expect, due to the fact that most smartphones cost a lot of money in this game you would like a lot more. This DLC doesn't really advertise what it is, just a

minore change would fix it though.
